SUMMARY

Engineering Manager with 21 years of experience leading test automation and quality engineering teams for high-stakes platforms (sportsbook, casino gaming, mobile telecom). Currently leading 10 engineers (managed teams up to 20) at Entain India, delivering automation for Ladbrokes and Coral sportsbook brands with 80% regression coverage. Driving AI transformation of quality engineering through multi-agent orchestration, MCP servers, and AI-powered test generation — cutting test design time by 80% and code generation by 75%. Proven track record of building automation frameworks, mentoring teams, and establishing CI/CD pipelines at scale.

CORE COMPETENCIES

Test Automation & QA: Selenium WebDriver · Playwright · Cypress · Appium · Cucumber/BDD · Karate DSL · TestNG · Pytest · JMeter · Postman · TestRail · Xray · BrowserStack · LambdaTest · Jenkins · CI/CD · Performance Testing · API Testing · Regression Strategy

Engineering Leadership: Team Management (10-20 engineers) · Technical Mentoring · Stakeholder Management · Engineering Strategy · KPI Alignment · Agile/Scrum · Cross-Functional Leadership

AI-Augmented Quality Engineering: Multi-Agent Test Automation · LLM Tool Calling · MCP (Model Context Protocol) · RAG · LangGraph · AI Code Review · AI Test Generation · Google Gemini · OpenAI

Programming & Platforms: Java · Python · TypeScript · Node.js · JavaScript · Git · GitLab · GitHub · Jira · Docker · AWS · SQL · MongoDB

EXPERIENCE

Automation Manager | Engineering Manager

Entain India (formerly Ivy Comptech) — Ladbrokes, Coral Sportsbook Sep 2019 – Present | Hyderabad | 6 yrs 10 mos

Team Leadership & Platform Automation:

- Currently lead 10 engineers (managed teams up to 20) responsible for automation of Digital Sportsbook brands Ladbrokes and Coral
- Achieved 80% regression suite automation enabling rapid release cycles
- Architected end-to-end test frameworks using Java, Playwright, Selenium, Cypress, Cucumber BDD, and Karate DSL

- Established CI/CD pipelines with Jenkins, BrowserStack/LambdaTest integration, and TestRail reporting
- Collaboration with product, dev, and infrastructure stakeholders to deliver projects aligned with company KPIs
- Mentored 30+ engineers throughout tenure on automation best practices, design patterns, and emerging technologies

AI Transformation of Quality Engineering (2024–Present):

- Designed and implemented an AI-Powered Test Automation Framework integrating multi-agent orchestration, MCP servers, AI steering files, and event-driven hooks
- Built MCP integrations for Jira, GitLab, TestRail, Xray, and a custom Project Bridge enabling AI-driven test case design and code generation
- Implemented specialist AI agents for ticket analysis, test design, code generation, code review, and quality gates
- Configured event-driven AI hooks for quality gates on every commit, automated linting, and Gherkin validation

Measurable Impact:

Metric	Before	After	Improvement
Test case design time	2-3 hours	15-30 min	80% faster
Code generation	4-6 hours	30-60 min	75% faster
PR review cycle	1-2 days	Same-day	50% faster
Cross-repo search	30+ min	<30 sec	98% faster
SDET onboarding	2-4 weeks	3-5 days	75% faster
Regression automation	Baseline	80% coverage	Faster releases

Lead Engineer (Test Engineering)

Scientific Games Pvt Ltd (WMS) Aug 2012 – Aug 2019 | Pune | 7 yrs 1 mo

RGS Platform — Casino Games platform with regulatory compliance requirements

- Led test engineering across multiple gaming platform releases for a regulated industry
- Automated full regression suite ensuring product quality on every release
- Developed automation scripts using Selenium WebDriver, TestNG, Java, and JMeter
- Automated COAT back office website end-to-end with Selenium + TestNG
- Built performance testing scripts using JMeter and analyzed bottlenecks
- Managed cross-functional QA teams under strict compliance standards

Test Lead

AgreeYa Mobility Nov 2011 – Aug 2012 | Pune | 10 mos

- Led BDD test automation for Vendor Self Invoicing Management Systems using Cucumber + Selenium Ruby
 - Managed a team of 4 engineers; established BDD adoption practices
-

Senior Software Engineer (Automation Test Lead)

Motorola Mobility Apr 2010 – Nov 2011 | Hyderabad | 1 yr 8 mos

- Developed Invader+ web automation framework using Selenium
 - Automated 40%+ of browser compliance test suite
 - Integrated new feature test coverage into existing framework
-

Senior QA Engineer

Azingo Inc. Aug 2009 – Mar 2010 | Hyderabad | 8 mos

- JavaScript test development for web widgets across multiple mobile platforms
-

Senior Software Engineer

Mascon Global (Client: Motorola) Aug 2008 – Feb 2009 | Bangalore | 7 mos

- Bluetooth connectivity testing for mobiles and BT-enabled devices
 - Developed shell-based test scripts for voice and data validation
-

Test Engineer

Tata Elxsi Ltd Apr 2005 – Aug 2008 | Bangalore | 3 yrs

- Bluetooth connectivity testing across device portfolio
 - Regression, Sanity, Interoperability, and Stress test execution
 - Use case design for Bluetooth UI and sub-feature components
-

PROJECTS

AI Stock Portfolio Analyzer — Personal Production System

Live: stock-portfolio-analyzer-ten.vercel.app | **GitHub:** github.com/kmnaidu/stock-portfolio-dashboard

Production AI platform demonstrating depth in modern AI engineering patterns:

- Multi-Agent system (5 specialist agents with Synthesis layer)
 - LangGraph Decision Agent with conditional routing
 - RAG pipeline with Vector DB for semantic similarity search
 - MCP server (5 tools) and hybrid Redis caching
 - 14 features, 12,400+ LOC, 50+ days in production, ₹0 infrastructure cost
-

EDUCATION

MCA (Master of Computer Applications) — Andhra University | 2001 – 2004 **B.Sc Computer Science** — Andhra University | 1998 – 2001

CERTIFICATIONS & LEARNING

- Generative AI: Working with Large Language Models (LinkedIn Learning, 2025)
 - LangGraph & Multi-Agent Systems (production implementation)
 - Model Context Protocol (MCP) — enterprise server development
 - Be the Manager Who Fights for Their Team (LinkedIn, 2022)
-

RECENT THOUGHT LEADERSHIP

- "AI-Powered Test Automation Framework" — Internal technical document driving org-wide AI adoption at Entain
- 5 LinkedIn articles on AI Engineering Leadership (3,800+ impressions)
- Open-source contributor: github.com/kmnaidu
